

RUSSELL ELLIOTT

(408) 607-7101 ◊ Santa Cruz, CA ◊ russell@quadsquad.net ◊ linkedin.com/in/russell-elliott-2001/ ◊ github.com/russellelliott

EDUCATION

University of California Santa Cruz, Santa Cruz, CA

Master of Science in Computer Science

Bachelor of Science in Computer Science

September 2024 - December 2025

June 2020 - June 2024

EXPERIENCE

Full Stack Software Engineer

May 2026 - Present

PerfectlySnug, Remote

- Built a shipment-fulfillment platform with Next.js, PostgreSQL, Prisma, and Docker that integrates Shopify order/fulfillment data with FedEx shipping APIs for automated shipment creation and label generation.
- Partnered with the FedEx API team to implement a two-stage cross-border fulfillment workflow, reducing manual shipping operations and driving an estimated \$1,000 per day in shipping-cost savings.
- Designed data models and API workflows for packages, shipments, invoices, FedEx tracking, and Shopify fulfillment updates.

AI Model Optimization Researcher

May 2025 - December 2025

iNRG Research Lab @ UCSC, Santa Cruz, CA

- Built LLM-based indoor geolocation system using frozen LLaMA-3.2-1B backbone, LoRA adapters, and custom MLP regression head, achieving 2.84m MAE.
- Engineered a preprocessing pipeline that transformed RSSI, FTM, and CSI WiFi telemetry into sequential model inputs, maintaining 2.5–3.5 m MAE during access-point signal dropout.
- Reduced target-site calibration requirements by 10× through transfer learning, achieving 0.88–0.96 m MAE with only 3–10% of target-environment data.

Full Stack Web Developer, Team Lead

January 2023 - June 2024

Tech4Good @ UCSC, Santa Cruz, CA

- Automated data pipelines and integrated APIs to power research and career platforms with real-world insights, using AngularJS, Firebase, and JavaScript.
- Improved user engagement by building text-annotation UI components and career video displays in AngularJS.
- Co-managed 100+ member lab, organizing tasks, prioritizing web app projects, and tracking progress in Airtable.

Web Developer, AI Integration Specialist

July 2022 - January 2024

sierrahiking.net, Remote

- Improved user navigation and engagement by designing and developing hiking-focused WordPress site with interactive master map and detailed trail pages.
- Enhanced trip-planning user experience by building WordPress plugin with OpenAI to generate custom backpacking lists.

PROJECTS

POI Validation Pipeline. Built 3-stage pipeline cleaning restaurant data across 300+ chains for Overture Maps using deterministic Google Places status detection and hybrid LLM data retrieval and augmentation with traceable sources. ([GitHub](#))

Apple Notes Semantic Search. Building MCP-powered note management system with semantic search via local LLMs, BERTopic clustering visualization, RAG pipelines, and LanceDB vector database over Apple Notes source data. ([GitHub](#))

LLM Security Benchmarking. Evaluated 5 LLMs across 25 threat categories, proving jailbreak prompts bypass safety filters (92% success rate). Built pipeline tracking rejection behaviors and cosine similarity of generated exploits. ([Scripts](#)) ([Graphs](#))

Luma Events Aggregator. Developed a Luma event discovery platform that aggregates and organizes existing event listings through data normalization, geographic filtering, classification, semantic embeddings, and topic clustering. ([GitHub](#))

SKILLS

Languages

Typescript, Javascript, SQL, Python, PHP, Swift, HTML, CSS, C, C++, Java

AI/ML Tools

TensorFlow, PyTorch, MLX, Hugging Face, LangChain, Numpy, Pandas, OpenAI

Web Development

ReactJS, AngularJS, Redux, NextJS, FastAPI, Flask, RESTful/GraphQL APIs, OpenAPI

Databases

PostgreSQL, MySQL, Firebase, MongoDB, LanceDB, Pinecone, Prisma

Platforms

Docker, Github, Gitlab, Websockets, Cypress, Jest, React Testing AWS (EC2/S3), GCP, VirtualBox
